# Storytelling

## **Ligne Roset. An inspired line across the generations. A story of a true family passion.**

In **1860**, Antoine Roset founded what would become a successful business making parasol handles. Thirty years later, when the parasol went out of fashion, Antoine preserved the jobs of his 30 employees by shifting the focus to the similar production of chair rungs and then to chairs, themselves. In **1893**, Marie Victorine took over the now successful and growing furnishings manufacturer: Roset company.

Fast forward to **1936** with Emile, another Roset family member, at the helm, when the first upholstered furniture was produced for the company. Followed in **1972** by Jean Roset who applied his love for nature and biodiversity to creating a park of thousands of trees which surrounds the factory to this day.

Leading to **1973** and the creation of the now iconic Togo, which matched comfort and lounge culture of the time with technical innovation resulting in one of the most original furniture designs of all time.

As Ligne Roset entered the 21<sup>st</sup> Century, brothers Pierre and Michel – great-grandsons of founder Antoine Roset – continued to lead the company forward for modern life. In **2004**, they insisted on opening a company day care to support families at the Briord headquarters and shifted the focus towards cleaner components such as solvent-free glues while delving into greater environmental and sustainable practices, always looking towards the future and humanity.

Each era poses its own unique challenges and, whatever tomorrow's may be, Ligne Roset will use its strong pioneering instinct to rise to the challenges, innovate, and foster the talents and innovations which are blossoming everywhere.

Making progress is in the company's DNA. After all, even in the name 'Roset,' one finds the word 'ose,' French for: 'to dare.'

## Production: better, & best.

At the heart of our design & production lines is another 'line': a guideline leading us down a path of greater responsibility, rooted in our convictions, and guiding our choices. Mindful of the global issues impacting the Earth's natural resources, we take great care with our material sourcing. 70% of the wood we use is PEFC / FSC-certified (from ecologically-managed forests). In the pursuit of clean air, our foams are certified CertiPUR, which notably guarantees either total absence of heavy metals, or their use within strict limits. Foams certified in this way emit no toxic substances during the course of their life.

Consideration is given to our fabrics, including the production of cotton, which requires large amounts of water and is also highly polluting (17% of water worldwide is polluted by the textile industry).

In the factory, we live by an eco-design methodology. Eco-design aims to introduce strict environmental criteria to the design of a product when it is first created. This approach considers every stage of a product's lifecycle, reducing the amount of materials used, optimizing the production process, limiting offcuts and waste, and promoting durability for long use as well as easy recyclability.

The innocuous nature of our products and their carefully selected components protects both working conditions in

the factory and living conditions of our customers.

We choose to comply with the strictest regulations to protect against the release of solvent waste into the atmosphere. In 2004, we were among the very first in the industry to replace solvent-based glues with the water-based variety. We use vinyl glues which have no impact on the environment and can easily be cleaned off tools and machinery by simply rinsing with water.

Our chipboard and MDF panels comply with international requirements of emissions grade E1, relating to the emission of formaldehyde (most notably CARB2). Any waste products are sorted, evaluated, and optimized. 100% of our materials are recyclable, and 100% of our wood scraps and offcuts are used to heat our factories. The 45,000 square meter Saint-Jean-Le-Vieux site is entirely heated by our wood offcuts, leading to a 40% reduction in waste in 10 years. Our furnace is monitored by DREAM and filtered by an electro filter which enables us to keep well below the threshold limit for waste.

Timeless lines and meticulous craftsmanship lend both elegance and robustness to pieces which are designed to last a lifetime, even several lifetimes. Our factories in Briord are also delighted to welcome these pieces back from all over the worlds for restoration.

# Le Lab

## A project for the circular economy.

More than 1.5 million Togo sofas and chairs have been sold world-wide. Such success also creates an invaluable pool of resources ripe for upgrading.

Our idea? To start a pilot program in France to collect used Togo seats from our customers, with a view to breathing new life into them. This project has several aims: to guarantee that any seats that cannot be restored will be recycled and to promote the circular economy by restoring the rest and returning them to embellish the customer's interior anew, at a gentler price and almost equal in quality to a brand new item.

Working together.

Ligne Roset is just like all those people who have made it shine for the past 160 years: a “**brioland**” that is, an inhabitant of the town of Briord, in the Ain region of France. It was here that the brand was born and it has established itself there just as one would in one of its seats: comfortably and sustainably – in fact, some of our staff have been with us for 3 generations.

Here, 30% of our suppliers are neighbors. 805 artisans produce 95% of our seating in the kind of working comfort to which we devote as much attention to their wellbeing as they do to their work. Equipment is regularly checked by ergonomists and modernized with a view to making everyday life in the factory as easy as possible (i.e. lifting tables; saws equipped with an unloading robot to remove all need for handling; a machine which automatically cuts the threads when sewing; a reduction in noise pollution, to name a few). Also, in this vein, training in posture and working positions is provided each year. Supplier packaging is made lighter at our request to facilitate handling.

Ligne Roset hopes to promote a good work/life balance: five holiday homes are at the disposal of our staff; factory workers receive 2 extra days’ holiday; and we have been one of the first to finance a company day care, prioritized for staff while also open to the community. This ‘made in Briord’ trusted relationship with our community is an essential component of our social contract, ever-evolving along with the expectations, lifestyles and rhythms of our staff; we are listening to them.

**1600 threads now cut automatically for the Ruché settee**  
**300 seats a day produced in Briord**  
**85 % of our collections made in France.**

Mentoring Project :  
better working also means  
better integration.

Conscious of our vital role as a local economic motor and keepers of unique, age-old expertise, we see it as our responsibility to work to revitalize our region. Since January 2021, in partnership with the local Pôle Emploi, we’ve established a new mentoring program, working with young unemployed neighbors to give them training in certain crafts, such as upholstery or sewing, with the aim of permanently taking on those who respond positively.

And tomorrow ?

**An apprenticeship program for seamstresses ? Organic leather ? Bio-sourced fabric ? Using fabrics dyed with biodegradable bacterial pigments ?**

**New ideas abound and Ligne Roset is determined to test, explore, and implement these innovations at the heart of its design process. This is exactly what we have begun to do by entering into an environmental responsibility partnership with Kvadrat.**

Really

Upcycled textiles,  
designed for circularity

© Angela Moore

In response to the urgent global issue of waste, Really upcycles textiles to create materials that challenge the design and architecture industries to rethink their use of resources and to design with a circular economy in mind.

Our mission is to create materials that contribute positively to a more sustainable future, with as little textile waste as possible. We do this by upcycling end-of-life textiles into premium-quality engineered circular materials.

Ligne Roset is always looking to create innovative furniture that challenges convention. Really’s manufacturing process does not involve the use of dyes, water, or toxic chemicals and it generates only recyclable waste. This underlines the fact that what is considered ‘waste’ can still be a resource for innovative materials.

All input textiles coming from global recyclers, Kvadrat, Industrial Service Laundries, and our clients are sorted by color and type to remove the need for dying and ensure the quality and consistency of material properties. The result is designed for circularity, recycling used products into new ones. Really is partly owned by Kvadrat and the end-of-life textiles recycled come among others from Kvadrat’s production and supply chain.

# Kvadrat Febrik

Knitted textiles designed to last

## Connected from the start

The enduring collaboration between Kvadrat/Febrik and Ligne Roset began with the launch of Ronan & Erwan Bouroullec's Ploum settee. This demonstrated how a knitted stretch textile and its voluminous 3D effect can contribute to the look and comfort of a product. Upholstered in Mood, the Ploum settee became an icon in itself and breathed new life into Febrik as a brand for knitted upholstery textiles.

Ligne Roset and Kvadrat/Febrik collaborate to create textiles that add an extra dimension to products, making them stand out from the rest. Sustainability is an important theme in the development and production of textiles, and creating long-lasting partner relationships is also a way to utilize each other's added value expertise, creating products that last forever.

## Sustainable production & product

Kvadrat/Febrik textiles contain mainly wool, a natural and sustainable resource. Wool has many excellent properties. The yarn, from the raw fleece of Australian sheep, achieves high durability scores for pilling and abrasion, and it is also intrinsically water-repellent and flame retardant with no additional chemical finishes needed. Products upholstered in these textiles are suitable for all kinds of environments and locations.

Each textile follows a journey through production facilities located close to each other, all in Europe: from the yarn, spun and dyed in Germany, through the Dutch knitting mill and then on to be cut, sewn, and upholstered at the Ligne Roset factories in Briord, France. In this way, we ensure a short production loop, avoiding chains that will negatively impact the level of sustainability.

## Knitted textile

With their interlinked loops, knits result in a stretch textile which allows Ligne Roset to upholster organically-shaped products much more quickly and easily. This elasticity is the result of its knitted construction, which is a sustainable alternative to adding plastic-based elastic yarns. The thickness, one of the signature features of the Kvadrat/Febrik collection, comprises just one layer of material, keeping the material's components to the essentials without compromise in terms of comfort.

### Taru – Sebastian Herkner

Ligne Roset's expert craftsmanship illuminates Taru's welcoming, subtly curved back following the line of the fully upholstered base.

### Exclusif – Didier Gomez

With just a few elements, this elegant collection can create a multitude of exceptionally comfortable sofa and sectional combinations.

### Exclusif 2 – Didier Gomez

The Exclusif model is complemented by a version with brilliant or black chromed finish legs in Exclusif 2.

Prado – Christian Werner

Prado's generous bench seat and back cushions are willfully freeform: one can sit or lie down as they wish.

Ploum – Ronan & Erwan Bouroullec

Ploum is the fruit of much research into comfort. The result delivers extreme comfort and accommodates different ways of sitting.

Ipanéma – Didier Gomez

Curving, enveloping, full of glamour, Ipanema is the new deco seating trend par excellence, inspired by architect Roberto Burle Marx.

Enki – Evangelos Vasileiou

A continuous base and backing structure give Enki the ability to respond to the needs of any space.

Nils – Didier Gomez

Named after a 1906 novel, Nils is imbued with casual elegance, its simplicity offset by the sophistication of the seam.

Nomade 2 – Didier Gomez

Nomade 2 is a Parisian collection, in the "Rive Gauche" spirit, in the French "decorative arts" tradition.

Cover 1 – Marie Christine Dorner

Apparent sensuality and comfort mask the surprising simplicity of Cover's use: an easily removable cover, making its maintenance a pleasure.

Pukka – Yabu Pushelberg

Yabu Pushelberg designed the Pukka collection to transcend time and space with organic, feminine forms that merge with any space.

Cosse – Philippe Nigro

Composed of soft, welcoming contours, and an all-enveloping form floating above the ground, sustained by a beech or steel structure.

Ruché – Inga Sempé

"Ruché" is derived from a sewing technique, the result of which is a harmony of straight lines and soft curves.

Uncover – Marie Christine Dorner

Cover, divested of its winter coat, becomes Uncover: an ultra-comfortable, all-foam settee—light, compact, easy to move, for year-round cocooning.

Hémicycle – Philippe Nigro

Conceived with Mobilier National, the Hémicycle collection fits within the highest echelons of power, or the intimacy of private homes.

Philéas – Philippe Nigro

Inspired by the banquettes of the Orient Express, Philéas offers enveloping comfort, carefully-crafted quilting, achieved using ultra-flexible foam.

Manarola – Philippe Nigro

Philippe Nigro reinvents the generous comfort offered by Ligne Roset's all-foam seating of the seventies with this collection.

Togo – Michel Ducaroy

Created for afternoon siestas or lazy evenings, Michel Ducaroy's Togo has been the ultimate in comfort and style for decades.

Paipaï – LucidiPevere

Inspired by origami and its folds, Paipaï's ultra-flexible foam body is shaped by pleated lines.

Okura – Eric Jourdan

Okura's rounded edges and design inspiration come from both its namesake hotel in Tokyo and by American mid-century modernism.

Asmara – Bernard Govin

First produced in 1967, the modular, foam pieces of Asmara are ushered in anew in recognition of our 160th anniversary.

### Andy – Pierre Paulin

A Pierre Paulin reissue, Andy consists of four brilliant chrome-plated legs, set in the armrests to impart a sense of lightness.

### Pumpkin – Pierre Paulin

A reissue by Pierre Paulin, who designed Pumpkin for former French president Georges Pompidou's private quarters in the Elysée Palace.

### Bonnie – Pierre Paulin

A Pierre Paulin reissue, Bonnie is made fiercely comfortable by a foam core that rigorously adheres to the body's contours.

### L'Imprévu – Marie Christine Dorner

French for unexpected, L'Imprévu is a versatile seating design that is furthered by its ability to create a sleeping area.

### Elysée – Pierre Paulin

A Pierre Paulin reissue, the compact size and visual lightness of this chair makes it ideal for smaller living spaces.

### Facett – Ronan & Erwan Bouroullec

This multifaceted collection is ideal for urban living, with small proportions and flexible ottomans.

### Moël 2 – Inga Sempé

For Moël's 10th anniversary, Ligne Roset presents Moël 2, with updated stitching and a new, thick felted wool back.

### Plumy – Annie Hiéronimus

Inspired by the 1980s, Plumy is the epitome of relaxation with cushions that can fold into a chaise longue position.

### Flax – Philippe Nigro

Comfortable, easy on the eye and compact—Flax is ideal for small spaces, with its walnut frame lightening the interior.

### Moël – Inga Sempé

A return to the all-foam savoir faire of Ligne Roset, Moël is a fashionable, enveloping armchair.

### Amédée – Marie Christine Dorner

Amédée is designed around a lumbar cushion, quilted and shaped like the bucket seat of a sports car.

### Long Island – N. Nasrallah & C. Horner

Long Island combines exemplary comfort, remarkable elegance, and a vast choice of covering materials and colors.

### Ottoman – Noé Duchaufour-Lawrance

This all-foam seating collection combines shape and stylized stitching to provide ideal comfort and unparalleled durability.

### Riga – Eric Jourdan

Riga is a contemporary reinterpretation of the Voltaire chair, pared down while maintaining its legacy of comfort and poise.

### Saparella – Michel Ducaroy

A Michel Ducaroy reissue, Saparella is a modular collection with rounded, airy lines, inviting you to enjoy a beautiful day.

### Soufflot – Jean-Philippe Nuel

Designed to reside beneath the soaring Hôtel-Dieu de Lyon's dome, Soufflot ably captures the spaces specific volume in its form.

### Archi – Pierre Paulin

A Pierre Paulin reissue, Archi's generous slope and ergonomic seat design support the body perfectly.

### Astair – Pierre Charpin

Astair is a contemporary reinterpretation of the wing chair, with technical detailing that offers support to the entire body.

### Elsa – François Bauchet

This small-scale armchair offers unexpected comfort with its sculptural seat, available in both a high and low version.

### Moa – Keiji Takeuchi

Advocating simplicity and objects' purposeful roles in one's space, Moa's minimal beauty and honed functionality subscribes to living more with less.

### Anda – Pierre Paulin

The elegance of Anda is apparent in its curves, which envelope the body beautifully.

### Confluences 2 – Philippe Nigro
